**MEMORANDUM FOR: Deputy Director for Intelligence
Director of National Estimates**

Ray and Sherm:

After five days as Executive Director-Comptroller I am convinced that one of the first problems I have to solve is how to get the tremendous volume of paper which flows into my office reduced to something manageable. One of the things I find most interesting but because of priorities I think that I shall have to forego is the draft NIEs and SNIEs.

Would you please delete me from the distribution list for these drafts unless there should be something of special significance which I should see, in which case I should appreciate receiving a copy. I of course would like to continue receiving the finished estimates.
